I. INTRODUCTION

A. Philosophy and Purpose

The University of North Texas Psychology Clinic was founded in 1972. The purpose of the Clinic is threefold: Professional Training, Scientific Research and Community Service. Professional, competent training in evidenced-based clinical services and research is offered to graduate students in the applied programs of the Department of Psychology.

The Psychology Clinic staff of graduate students and their faculty supervisors provide confidential psychological services to the people of Denton County and the surrounding areas, including the Dallas/Ft. Worth Metroplex. These services are designed to be responsive to the needs of the community and related human services. Psychology Clinic services are directed toward prevention, evaluation, and intervention.

The professional orientation of the Clinic can best be described as eclectic. Family therapy, child therapy, marital counseling, and individual counseling and psychotherapy, group therapy and various evaluation/assessment methods are offered. Behavior modification, psychotherapy for life-situation/life-style adjustment, and chronic mental illness are available. Clients are thus able to receive appropriate help for diverse problems and students in training are afforded the opportunity to acquire related foundational and functional professional competencies in evidenced-based assessment and intervention services.

B. Ethics, Confidentiality, and Professionalism

Professionalism, ethical conduct, and confidentiality prevail in the operation of the Psychology Clinic. The Psychology Clinic adheres to all appropriate professional guidelines stipulated by the American Psychological Association (APA, 2002 – including 2010 Amendments) and the state of Texas. The Clinic also utilizes specified procedures and practices regarding the use of social media for staff and clients (see appendices). Each case is handled jointly by a graduate student and an experienced, qualified psychologist. The psychologist supervises the training student directly and has ultimate responsibility for case management. Records and information concerning clients are for administrative (see Federal HIPAA law [1996] and associated Security Rule [2003] for additional information), professional and research use only. No information regarding a client may be given to another person or agency unless the client designates his/her willingness by informed consent in writing or as required by Texas Statute (i.e., Health and Safety Code, CHAPTER 611. MENTAL HEALTH RECORDS, SECTION 571.015 INSPECTION OF COURT RECORDS [See reference in Clinic Office]; TEXAS RULE OF EVIDENCE, RULE 510. CONFIDENTIALITY OF MENTAL HEALTH INFORMATION IN CIVIL CASES [See reference in Clinic Office]). Before a client gives approval for disclosure he/she should be made aware of the nature of the contents of such communication. No information regarding a client (even that he/she is a client) is transmitted to anyone via telephone, internet, or any other forms of communication. Client files and data (audio, DVD’s and/or tapes, assessment data, etc.) are locked in the Psychology Clinic at night. When such files and data are used by the student-clinician and/or supervisor these materials are handled in a professional and ethical manner.
**C. Diversity**

In accordance with APA guidelines for multiculturalism,[1] we adhere to the highest standards of professionalism, respect, and multicultural competence. In the clinic, our faculty, student-clinicians, and staff members honor, value, and appreciate diversity from all members of the community. We strive to provide quality services that are sensitive to all types of cultural and individual differences, including: age, race/ethnicity, sex, gender identity, nationality, socioeconomic status, military background, religious affiliation, sexual orientation, disability, and other valued components of diversity. We work to create an environment which promotes awareness and acceptance of unique individual differences, and we strive to provide culturally relevant and appropriate services in accordance to each client's personal preferences and needs.

**D. Clinic Staff**

1. **Professional Staff**

   Faculty supervisors oversee the vertical practicum teams that provide client care. The vertical team consists of graduate students at each level of training to each practicum team. One to three students at each level are assigned to each team, with an ideal team size of 5 to 7 members.

   Each vertical practicum team is supervised and assisted each academic year by a faculty supervisor from the clinical or counseling psychology program. Students are generally assigned to a team for one year. Students in the various applied graduate programs are assigned to teams by their respective program directors.

   The vertical team concept provides students at all levels of training with intense, in-depth, practical experience related to providing psychological services to clients. The assignment of students to a different vertical practicum team each year provides breadth with respect to professional orientations.

2. **Administrative Staff**

   The Clinic Director is responsible for the administrative functioning of the Psychology Clinic. The Clinic Director also serves as Chair of the Psychology Clinic Executive Committee (PCEC) that oversees research and determines practices and procedures in the Clinic. The Clinic Director is assigned a
Graduate Student Assistant(s) (GSA) who assist with the systematic collection of client outcome data, clinic operations as well as monitoring ongoing research projects. Administrative office personnel are an integral part of the Clinic functioning. They handle appointments, correspondence, filing, access to Clinic rooms, and other tasks assigned by the Clinic Director or Clinic Senior Administrative Specialist.

E. Physical Facilities

1. Therapy and Assessment Rooms

The Psychology Clinic is open while the university is in session, during which time a faculty supervisor is on duty. Morning, afternoon and evening appointments are available. Rooms are available for individual, group/family, and play therapy, as well as for vocational, psychological, and neuropsychological assessment. In addition, facilities are provided for digital recording and one-way visual as well as audio observation/supervision.

2. Materials and Equipment

Assessment materials are stored in the Anna Wright Memorial Assessment Library (“Test Storeroom” – Terrill Hall room 125) and may be checked out by authorized students during the posted hours. Graduate assistants operate the Assessment Library. Students who check out assessment materials are responsible for maintaining the confidential nature of the test materials as well as for their professional and responsible use.

Student-clinicians can check out equipment; e.g., tape recorders, CD/Tape players/recorders by signing for the equipment with the Assessment Library staff. It is the responsibility of the student-clinician to report any malfunctioning equipment to the Assessment Library staff so that it can be repaired.

Audio equipment is available for training and therapy use (electronic listening device with microphone “bug-in-the-ear” system). This equipment is monitored and checked out from the Clinic Director. Individuals using the equipment are responsible for leaving it in good order and for reporting any malfunctioning.

3. Clinic Parking

Note: Please ask clients to return parking permit at the end of each session to be used by other clients scheduled on the same day (not applicable for end of day appointments).
SUPERVISED PRACTICA: PRACTICES, DUTIES, AND RESPONSIBILITIES

The UNT Psychology Clinic is simultaneously a community service, professional training, and scientific research facility. As such, its personnel - faculty, students, and staff are jointly responsible for their professional and ethical conduct, as well as procedural standards.

Coverage for the clinic is provided during all hours of Clinic operation by a faculty supervisor and a student-clinician. Practices, duties, and responsibilities involved in this coverage and overall management of cases are outlined below.

F. Practicum Team

The main vehicle of service, training, and research in the Psychology Clinic is the practicum team, which is comprised of a faculty supervisor and doctoral-level graduate students. Each of these individuals is responsible for specific duties and procedures.

1. The Faculty Supervisor

   The duties and responsibilities of the faculty supervisor are considerable. He or she must constantly oversee, guide, and coordinate the professional training of students, the provision of high quality services to clients, and contributory participation in Clinic research projects. Both ethically and legally, it is the faculty supervisor’s professional competence and license that are invoked and, at times, evaluated as supporting professional training and services.

   Besides knowing and conforming with Texas State Law and the Ethical Principles of Psychologists and Code of Conduct of the American Psychological Association (2002 with 2010 Amendments), faculty supervisors are responsible for the following:

   a) Maintaining professional licensure and providing most current copy for Clinic records
   b) Serving as the on-site faculty supervisor during assigned times when the Clinic is open. Each supervisor carries a cell phone while on duty
   c) Overseeing cases assigned to practicum students for intake, assessment, and/or treatment
   d) Meeting regularly with practicum students for both group and individual supervision to review case progress, the refinement and/or revision of clinical services, and other professional training (e.g., crisis management, suicide evaluations, supervision methods, etc.)
   e) The supervisor is responsible (professionally, ethically, and legally) for the quality of services provided to clients by team members.
   f) Transfer, termination, and disposition of cases is the responsibility of the supervisor.
   g) Signing all case progress notes, written reports and initialing letters or correspondence connected with assigned cases
   h) The supervisor is responsible for the quality of reports and integrity of files assigned to practicum team members.
   i) Providing feedback to students, to the Clinic Director, and to the Director of Clinical or Counseling Training, both verbally and in writing, on their
evaluation of individual students’ competencies, areas of concern or potential improvement, and overall professional development

j) Serving as consultant to other teams when requested

2. The Practicum Student

Students are assigned to practicum teams by their program director on the basis of common interests, diversification of the student’s professional training, and related factors. Whenever possible, students are assigned to practicum teams that best reflect the student’s rank-ordered preferences and professional development.

Practicum students are expected to conduct themselves professionally, both within the Clinic and without. Within the Clinic includes appropriate behavior, professional attire, and responsible treatment of all materials.

In addition to the time spent in weekly team meetings and individual supervision, practicum students are expected to spend an additional 6 to 9 hours per week in direct services, record keeping, and session review. Students are given approval to accept cases by their faculty supervisor. Case assignments are always in accordance with the student’s developing competencies and the clinical needs and requests of the client(s).

a) Practicum students are responsible for the following:

(1) STUDENTS ARE TO ADHERE TO THE HIGHEST STANDARDS OF PROFESSIONAL PRACTICE WHILE IN THE CLINIC.

(2) Students comply with clinic’s social media procedures and practices (see Appendices)

(3) Students are expected to check their clinic mailboxes on a regular basis for any messages and respond accordingly. Any messages with PHI must be shredded once the clinician has contacted the client and properly documented contact in the client’s electronic record.

(4) Students are expected to arrive promptly for “on-call” duty time and scheduled appointments, to be dressed professionally (e.g., no flip-flop shoes, shorts, tattered jeans, strapless or spaghetti-strap blouses, tank-tops, etc.), to vacate therapy rooms promptly, 10 minutes before the next scheduled appointment, to leave therapy rooms in good order (replace any furniture moved, etc.), and report any malfunctioning equipment to Clinic office staff.

(5) The student assigned on-call coverage must notify the Clinic office staff at the beginning of their on-duty time and be available in the on-call room (Terrill Hall 147). On-call is a full 1-hour commitment.

(6) Students are expected to arrange for a replacement if unable to be present for assigned on-call hour.

(7) The student on-call will be expected to take referral information from perspective Clinic clients who telephone or walk-in to the Clinic and schedule an initial intake appointment. Remember that individuals are afforded the same privilege of confidentiality whether they are a perspective or actual Clinic client.

(8) On-call clinicians will also be asked to assist with general clinic functions (e.g., answering telephone/taking messages, return calls requesting additional information) as needed an instructed by Clinic Director or
The On-call clinician takes “blue-sheet” or “pink-sheet” information over the phone or with the walk-in. If the individual is a prospective therapy client, the on-call clinician proceeds to the steps outlined below. However, if individual is requesting specialized services (e.g., assessment, child, group, couples/family, etc.) or there is a notice posted regarding a therapy waiting list, then the clinician completes blue/pink sheet and turns it into the part-time staff who will begin process of entering information in the system.

(a) Once blue-sheet information is completed, the clinician checks available “initial intake” appointment times and schedules with prospective client. There will be an appointment book in the on-call room to write down the client’s name under the corresponding time. Be sure to ask client to arrive at least **45 minutes** before the scheduled appointment time to complete all necessary paperwork. It is also very important that the client understand that he/she will initially be meeting with an “intake coordinator” and that his/her permanent therapist will be assigned after more information (and presumably a more appropriate match is made) is gathered.

(b) Complete the form which instructs the staff to schedule a room and notify the assigned intake clinician (via e-mail and clinician mailbox) of the scheduled intake.

(10) The student on call will be expected to handle or assist with any crisis situations that occur during his/her designated Clinic coverage time (refer to the General Procedure Section in this manual for a discussion of Emergencies [click for more information about emergencies]).

(11) If, at the end of the Clinic day, an emergency situation arises or is in progress, the clinician will notify the Clinic office staff so that the on-duty supervisor can be notified and remain on duty until the emergency is resolved. The on-call student-clinician will also be expected to remain after hours to offer any assistance necessary (e.g., remain in the Clinic office after the office staff have left for the day, answer in-coming crisis-related phone calls, lock rooms etc.).

**Note:** All students working in the clinic are expected to provide “on-call” coverage unless explicitly receiving permission from the clinic director to do otherwise. For example, students working in the clinic to finish incomplete practicum coursework (e.g., assessments), even though not currently enrolled
in practicum, are required to potentially provide an “on-call hour” timeslot as needed by the clinic.

(12) Student clinicians will be scheduled for one "intake hour" in addition to their "on-call" hour. Please refer to General procedure section in this manual for a discussion of the "initial intake" process (click here for more information).

(13) IN ALL EXCEPT EMERGENCY SITUATIONS, CLINICIANS WILL VACATE CLINIC ROOMS 10 MINUTES BEFORE CLINIC CLOSING TIME.

(14) The Clinic is a public facility which offers services to Denton and surrounding communities. The decision to seek and receive psychological services is a serious matter for most individuals. Students need to be equally as serious about maintaining an appropriate environment where clients can receive professional services.

(15) Students are to be in the Clinic only when they are conducting Clinic business.

(16) The Clinic is NOT to be used as a gathering place. Students should utilize the lounge space located directly above the Clinic in Terrill Hall (room 247) or shared space in graduate student cubical-desk area (southeast corner of 2nd floor).

(17) Computers, printers, copiers, and phones are for clinic-related activities only (i.e., practicum and applied course activities)

(18) Practicum students’ Roles and Responsibilities (Goals of Vertical Team Concept) are generally as follows:

(a) Third Year Students and above:

   (i) Assume responsibility for assessment and/or therapy cases as instructed by practicum supervisor
   (ii) Assume responsibility for records management, consultation, peer supervision, referral, transfer, and termination of their Clinic cases as directed by the supervisor
   (iii) Perform Clinic duties as outlined in Clinic Procedures section of this manual (click for more information)
   (iv) Provide on-call coverage and conduct scheduled initial intakes as scheduled
   (v) Participate in team meeting case presentations

(b) Second Year Students:

   (i) Assume responsibility for assessment and/or therapy cases as instructed by practicum supervisor
   (ii) Perform Clinic duties as outlined in Clinic Procedures section of this manual (click for more information)
   (iii) Serve as on-call clinician and conduct scheduled initial intakes as scheduled
(iv) Assist advanced team members and supervisor in practicum activities and observe their activities
(v) Participate in team and case presentations

(c) First Year Students:

(i) Meet course requirements for Psychology 5420/5430 and acquire basic assessment skills to administer and interpret psychological objective and projective tests. Successfully complete Psychology 5420/5430 check outs.
(ii) Become familiar with all Clinic procedures and practices as outlined in this manual.
(iii) Observe second, third and fourth year students conducting assessments, interviews, and therapy as well as all other associated Clinic procedures
(iv) Perform interviews (social history, developmental history, mental status) and assist second year students with assessments after Psychology 5420/5430 check out, as directed by supervisor
(v) Participate in intakes and therapy sessions at supervisor’s discretion
(vi) Attend team meetings
(vii) Fulfill general practicum student responsibilities in the Clinic when working with advanced students on cases and intakes
(viii) Serve as on-call clinician and conduct scheduled initial intakes as scheduled (at supervisor’s discretion)

G. PRACTICUM CASE LOAD AND HOUR REQUIREMENTS

1. Practicum Hours Tracking
   a) Practicum time logs are maintained by each practicum student to keep a running total of experience in practicum and other psychological interventions.

   NOTE: Clinical record-keeping should begin at the very beginning of one’s clinical training. Internship sites will require extensive information on their applications; the better your records are, the easier the application process will be.

Students are strongly encouraged to track hours by using APPIC’s (Association of Psychology Postdoctoral & Internship Centers) requirements. Please consult with your program director regarding which specific format to adopt (e.g., Time2Track, MyPsychTrack, etc.).

   b) Each student is responsible for recording a cumulative total to ensure awareness of progress toward meeting his/her program’s hourly requirements.
c) APPIC requires that applicants record information regarding the populations served (see APPIC application on the web page located at WWW.APPIC.ORG for current requirements). Students should track this information as well.

d) Additionally, the APPIC application will ask for information regarding treatment settings, type and number of tests administered, gender, and special populations served (e.g., disability, sexual orientation, minorities). Student-clinicians are STRONGLY ENCOURAGED to develop a routine for tracking this information (see APPIC application on the web page located at WWW.APPIC.ORG for current requirements) to keep as part of their personal records (***you will wish you had when applying for internship***).

e) At the end of each semester, the student is responsible, in collaboration with his/her clinic supervisor and program director, for documenting hours. Documented hours should be given to the Psychology Department Graduate Coordinator for placement in student’s file. The clinic database (i.e., Titanium) allows the clinic director, supervisors, and programs to track contact hours for auditing purposes only.

**IMPORTANT NOTE:** Each student-clinician is responsible for documenting the information required by his/her program. Please refer to your respective program manual and program director for additional information regarding practicum requirements.

**H. EVALUATION PROCEDURES:**

1. Supervisor Evaluation of Students

   Supervisors provide all team members with periodic feedback on their practicum performance as part of the student’s learning experience (based at least in part from DIRECT OBSERVATION of students’ delivery of clinical services). This feedback process is an on-going part of supervision and team interaction. Supervisors provide formative and summative evaluations each semester. The Practicum Evaluation Form should be completed by the supervisor, discussed with the student, signed by both student and supervisor each semester. A copy of the evaluation goes in the student’s permanent file. The student’s grade in practicum is therefore based on 1) meeting program hour requirements for direct client contact, technical assistance, observation, assessments, supervision received and/or provided; 2) Supervisor’s evaluation of student’s performance; and 3) Student’s performance in the Clinic.

2. Clinic Evaluation of Students

   a) **File Reminder Notices and Audits:** Case files are reviewed periodically by the Clinic to check for completeness and accuracy. A notice is sent to the student via e-mail or placed in the student’s Titanium “Task List” indicating what is lacking.

   b) **Clinic Performance Input into Practicum Grades:**
Practicum students’ performance in the Clinic is an integral part of their training experience. Case management and direct contact with community members as well as responsibility to an agency are aspects of the practicum which are emphasized within the Clinic. Therefore, the Clinic Director monitors and evaluates the performance of students in pertinent areas, including weekly random file audits. This evaluation is weighted in the student’s practicum grade.

(1) The Clinic Director may suspend a student from the Clinic if his/her behavior violates ethical standards, Clinic procedures or places clients in jeopardy. If a student has not made up deficiencies and/or made arrangements for transfer/termination of cases prior to the end of the semester, the student will receive a grade of Incomplete (I), or the student’s grade may be lowered. Additionally, the student may be required to complete remedial work assigned by the Clinic Director in order to demonstrate minimal competency, professionalism, etc.

(2) Students may appeal any disciplinary action of the Clinic Director to the Psychology Clinic Executive Committee (PCEC).

(3) Students’ Responsibilities in the Clinic: Evaluations are based on the ethical and professional manner in which the student conducts him/herself in carrying out the following duties and responsibilities:
   (a) Check in on time for on-duty coverage and scheduled intake appointments (ensuring coverage during required absences)
   (b) Verbally review and appropriately document (i.e., Intake Note) the content of the UNT Psychology Clinic Consent for Treatment form with client and ensure signatures are obtained for any release forms used
   (c) Keep ALL CLIENT DATA, INCLUDING AUDIO AND DIGITAL RECORDINGS, and files in the Clinic when not being used for supervision. Client information should NEVER leave the building, under ANY circumstances, without the approval of the Clinic Director
   (d) Promptly return messages left by clients and communicate with Clinic staff as needed regarding fees, appointments, etc.

(e) Be on time for scheduled appointments
(f) Enter appointments in Riverstick (i.e., digital recording) and Titanium (i.e., clinic database) IN ADVANCE
(g) Contact and schedule appointment with assigned client promptly
(h) Have intake reports, treatment plans, assessment reports, and other file data in the client folder as required (exception - initial intake paperwork is given to clinic staff)

(i) Check personal clinic mailboxes and your UNT e-mail for messages and materials on a regular basis

(j) Open/close files appropriately and in a timely manner

(k) Maintain quality of intake reports, treatment plans, assessment reports, termination summaries, and termination reports

(l) **KEEP FILES UP-TO-DATE**

(m) Monitor information on the Emergency Information Form to ensure that it is current

(n) **TURN IN FILES 30 MINUTES PRIOR TO CLINIC CLOSING TIME**

(o) Submit a “Transfer Request Form” (green) for all cases which need to be transferred (recommending who the new therapist should be with rationale) prior to submitting the file for closing

(p) Submit a “Transfer of Supervision Note” within Titanium when the clinician is continuing with the same client but changing supervisors (most commonly at the beginning of the Summer term and Fall semester). To do this, the clinician should select their current supervisor and assuming supervisor within the data form. The clinician should sign on line 1, the current supervisor should sign on line 2, and the assuming supervisor should sign on line 3. Once the assuming supervisor has signed on line three, the clinician should print the data form, attach it to their client’s file and submit it to the Clinic Senior Administrative Specialist.

(q) When it is necessary to send reports, document communications, etc. from a file that has already been closed, the student-clinician will have the Clinic Director co-sign appropriate Titanium notations.

(r) Check bulletin boards and chalkboard regularly and adhere to any new procedures

(s) **VACATE THERAPY/ASSESSMENT ROOMS PROMPTLY (10 MINUTES BEFORE THE NEXT SCHEDULED APPOINTMENT/END OF THE CLINIC DAY)**

(t) Clean out mailboxes at the end of each semester, and NEVER leave client data (i.e. testing data, blue or pink sheets, etc.) in mailboxes. At the end of the spring semester, EVERYTHING MUST GO, in order for the staff to get ready for the next academic year! (exception - students enrolled in practicum for the summer sessions).

### II. PSYCHOLOGY CLINIC PRACTICES AND PROCEDURES

As a service, training and research facility, the UNT Psychology Clinic follows procedures designed to ensure consistently high quality and confidential service delivery, to instill high standards and professionalism in students, and to gather data which promotes quality and advances knowledge.

**NOTE:** MANY SAMPLE FORMS MENTIONED IN THIS SECTION SHOULD BE AVAILABLE IN THE CLINICIANS’ WAITING ROOM OR AVAILABLE FROM OFFICE STAFF.
A. GENERAL POLICIES AND PROCEDURES

THE FOLLOWING APPLY TO ALL CLINIC CASES.

1. Assignment of Cases
   a) Therapy Cases:
      Therapy cases are referred/assigned to student-clinicians by the Clinic Director on a rotating basis. The student and his/her supervisor determine appropriate disposition of the case (e.g., acceptance, transfer, or referral). When a case is accepted by a student-clinician and his/her supervisor, the procedures outlined in the following sections will be observed (Click here for more information on therapy cases).

   NOTE: Case load information reflects both the number of “bluesheet” referrals assigned and files currently open. Because therapy cases are assigned based on caseload and date of last case assignment, it is essential that students keep information updated (e.g., return “bluesheet” referrals as soon as possible, close inactive cases/files).

   b) Assessment Cases:
      Assessment cases are referred/assigned to student-clinicians on a rotating basis by the Clinic Senior Administrative Specialist. The student-clinician and his/her supervisor determine appropriate disposition of the case (e.g., acceptance, transfer, or referral). When a case is accepted by a student-clinician and his/her supervisor, the procedures outlined in the following sections will be observed (Click here for more information on assessment cases).

2. Contacting Clients
   a) Client phone numbers are available on the referral form, Personal Information Form, Emergency Intervention form, and client index card. The student-clinician should pay close attention to the contact number preferred by the client. These numbers should be kept current. Additionally, the student-clinician should carefully read information on the referral form regarding messages, voicemail, caller I.D., etc.

   (1) The student-clinician should be circumspect when calling a client or potential client. Leave only your name and number; do not identify yourself as a clinician to family members, co-workers, answering machines, or voicemail.

   (2) Use of the Clinic phones is restricted to client-related calls. Clinic Staff will not be responsible for taking personal messages.

   (3) The student-clinician should have possible appointment times clearly in mind to offer the client before calling.

   (4) All phone calls are recorded in a “File Activity” note entry in Titanium (e.g., messages left, appointments scheduled, etc.).

   (5) Student clinicians may contact clients through the psychology clinic@UNT.edu e-mail only. Do Not Use student or personal e-mail to...
communicate with clients. Clinicians should use their Hushmail account (see detailed information on p. 24) to forward message for the Clinic Senior Administrative Specialist to send to the client.

(6) If you receive a client that is no longer interested in services, please ensure that all contact attempts are documented on back of the sheet and in “File-Activity Note(s)” as well as reviewing the check-list items. Then complete a “Supervisor Close Note” in Titanium. Once your supervisor has signed-off on all Ti notes, return the pink/blue sheet back to Clinic Senior Administrative Specialist. If you complete an intake and open the file; however, the client is no longer interested in services or does not return to the clinic, please submit a Therapy or Assessment Close Note and required data form instead, followed by a Clinic Director Close Note.

**NOTE:** Any communication involving pertinent information (e.g., crisis intervention, detailed information disclosed by the client, physician/referral source contact, etc.) should be documented in a “Progress Note” entry in Titanium.

3. Appointment and Room Scheduling
   a) By the end of each week a student-clinician should attempt to set his/her appointments for the next week in the Riverstick recording calendar under “Schedule Management” and Titanium. This is essential to keep Clinic office staff adequately informed to answer questions from clients regarding their appointment time, clinician’s name, etc.
   b) Student-clinicians schedule rooms and appointment times **IN ADVANCE**, using both Riverstick and Titanium. In case of cancellation, the student or office staff cancels the appointment, which releases the room. When used for coursework (the lowest priority), the qualifier “Course Work” should be selected to indicate that the room is available for direct client services. Rooms **MAY NOT** be scheduled more than one week in advance. Only the Clinic Senior Administrative Specialist will assign rooms for the entire semester (typically reserved for courses only)
   c) **CLINIC ROOMS ARE ONLY SCHEDULED ON THE HOUR.** Scheduling a room on the half hour is only done in very rare circumstances with prior approval from the Clinic administrative Specialist.

**NOTE:** Use of Clinic rooms is prioritized in the following manner: 1. direct client services, 2. applied training, 3. other approved uses (e.g., sport psych, research).

d) All “other” uses of Clinic rooms (e.g., research, studying for comps, etc.) must be approved in advance by the Clinic Director or Clinic Senior Administrative Specialist.

e) Any appointments scheduled outside of regular clinic client hours (M-Th 10 am to 8 pm, and Fridays 10 am to 5 pm), must have a signed yellow “**Off Hours Request**” form submitted (with supervisor’s signature) to the clinic Senior Administrative Specialist before scheduling the client.
4. Use of Therapy Rooms
   a) It is the student-clinician’s obligation to vacate therapy rooms on time. Rooms used for therapy and assessment are vacated 10 minutes before the next scheduled appointment. The last appointment of the day ends 10 minutes prior to clinic closing time.
   b) It is the student-clinician’s responsibility to ensure that the room is ready for the next session (furniture in place, etc.)

5. Recording of Sessions
   a) Is required for all sessions unless otherwise approved
   b) Digital recording of rooms is the sole responsibility of the student-clinician. Student-clinicians indicate for digital recording to occur (placing a checkmark in the box before clicking save) at the same time that an appointment or room (i.e., “resource”) is scheduled in Riverstick, menu option “Schedule Management.” Any long-term (longer than 1-week) storage of recorded material or burning on to DVDs is done only by making a request by using the Riverstick “Save/Burn Management” menu option.
   c) When students retain digitally recorded materials long-term (i.e., IRC requirement of the counseling doctoral program), it is his/her responsibility to notify the clinic when the material is no longer needed and can be deleted.
   d) Audio tapes for recording of cases are assigned to student-clinicians by the Clinic Senior Administrative Specialist as needed (audio recording only MUST be approved by supervisor and Clinic Director).

ANY RECORDED MATERIAL (E.G., AUDIO, DVD) ARE TO REMAIN IN THE CLINIC LOCKED FILE CABINET EXCEPT WHEN BEING USED FOR SUPERVISION. RECORDED MATERIAL MUST BE ERASED OR DESTROYED AT THE CONCLUSION OF A CASE OR END OF THE SEMESTER (unless approved by supervisor for purposes of meeting program requirements and communicated to the Clinic Director).

6. Forms Used at Intake
   a) UNT Psychology Clinic Consent for Treatment form MUST BE ELECTRONICALLY SIGNED BY ALL CLIENTS AND INCLUDED IN ALL CLIENT FILES. It is the student-clinician’s responsibility to make sure the form has been signed before he/she discusses anything with the client.
   b) Each client is provided with the Notice of Privacy Practices (NPP) while completing intake procedures. A written copy is available upon request.
   c) Emergency Information is provided by ALL CLIENTS (printed copy placed at the top left-side of file). This information must be kept up to date and is the responsibility of the current student-clinician.
   d) Adult Clinic Personal Information must be completed by each adult client (over 18 years) receiving services. This information is completed online using the clinic laptop computers or with paper and pen. The clinic staff print the results after the client has completed them and before the intake
interview begins. Adults also complete the Psychiatric Diagnostic Screening Questionnaire (PDSQ, Zimmerman, 2002). The PDSQ will be re-administered at the end of each long semester to any client with 6 or more subsequent appointments.

- Please see chart in Clinician’s Waiting Room for immediate scoring information for PDSQ.
- After scoring, per instructions on the wall, administer follow up semi-structured interview for significant scale(s) as directed by your clinic supervisor.
  - Semi-Structured Interviews to choose from (Examples):
    - PDSQ Follow-Up Interview Guide
    - Structured Clinical Interview for DSM-IV Disorders (SCID-IV) and other Axis I interviews
    - Anxiety Disorder Interview Schedule (ADIS-IV)
    - Schedule of Affective Disorders and Schizophrenia (SADS)

- Ex: Client endorsed 9 questions related to GAD. According to the scoring instructions, scores above 7 are significant, therefore you could administer the GAD section of the ADIS-IV to assess the client thoroughly.

**e) Child/Adolescent Personal Information** must be completed by the child’s legal guardian or a legally appointed agent. If the client is a child (under 18 years) the legal guardian must be present at the time of intake. If the legal guardian is not present, the client must be rescheduled at a time when the legal guardian can be present. This information is completed online using the clinic laptop computers or with paper and pen. The clinic staff print the results after the client has completed them and before the intake interview begins (printed copy placed on the left-side of file - see sample in clinician’s waiting room).

**NOTE:** Any child under the age of 12 MUST have a legal guardian or a legally appointed agent present in the Clinic at ALL times. Children 12 years of age and older may be left in the care of the student-clinician for reasonable periods of time, given that the guardian has provided emergency contact information and made appropriate arrangements for the child’s lunch, transportation, etc.

**f) UNT Psychology Clinic Consent for Treatment** for Minor Child must be electronically signed by the child’s legal guardian BEFORE any psychological services can be initiated (also recommended to get signed assent when working with adolescents).

**g) Request for Release of Information Form.** If, in the judgment of the student-clinician/supervisor further information on the client needs to be obtained from individuals and/or agencies, then the clinician must have the client sign a **Request for Release of Information Form.** Or a **Two-way Release of Information Form**, signed by the client to allow the student-clinician to both receive and provide information. A separate form must be completed for each individual and/or agency to be contacted for information. The original is sent to the individual/agency specified and a
copy is given to the Clinic Senior Administrative Specialist to be scanned and attached to Medical Records Note in Titanium.

h) **Consent to Release Information Form.** If, in the judgment of the student-clinician/supervisor or by client request further information on the client needs to be sent to individuals and/or agencies, then the clinician must have the client sign a **Consent to Release Information Form.** A separate **Request/Consent for Release of Information Form** must be completed and signed for each individual/agency to be informed about the psychological contact taking place. The original is sent to the individual/agency specified and a copy given to the Clinic Senior Administrative Specialist to be scanned and attached to Medical Records Note in Titanium.

i) **Fee Agreement Form.** For both therapy and assessment clients, a Fee Agreement Form must be signed. Clinicians assigned to the case must fill in the fee amount owed by the client to the clinic, explain the fee collection and missed appointment practices of the UNT Psychology Clinic, and obtain a signature from the client. Give this form to the clinic’s Senior Administrative Specialist to be scanned into the client’s electronic Titanium file. **NOTE – fee reduction involves a separate application and review process.** Although I client may request a fee reduction, the original Fee Agreement Form should indicate the initial quoted fee.

(1) A client may submit an application for fee reduction at any time. The application MUST include some form of supporting documentation. The Clinic Director will review the application and make a final determination.

j) **Client Information Guide.** For both therapy and assessment client’s, please provide them with a client information guide that outlines practices of the clinic. Go over the information and ensure that clients understand our operations practices. This is purely a resource for clients and does not need to be maintained as an official part of their records.

k) After the intake session, all forms are to be attached to an **Open File Request Form** (white half-page) and put in room 171 in the Senior Administrative Specialist’s Inbox. If the clinician is conducting the intake for the clinic (during clinician’s scheduled “intake hour”), he/she should give paperwork directly to the office staff to be securely filed while the initial intake report is in progress. **NO FORMS ARE TO BE REMOVED FROM THE CLINIC EXCEPT FOR CONSULTATION WITH THE CASE SUPERVISOR AND MUST BE RETURNED 30 MINUTES PRIOR TO THE CLINIC CLOSING.**

7. **Intake Interview**

   Students will be assigned intake cases in two ways.

   a) Clinician will receive a “blue sheet” with a half page (white) indicating the scheduled initial intake appointment has been made during that clinicians "initial intake" hour. The student clinician will also receive e-mail notification that the appointment has been scheduled.

   b) Clinician will receive a “blue sheet” with memo attached. The clinician will need to contact the client and schedule the intake appointment. This process will typically occur with child, couple/marital and family therapy.
cases, during wait-list times as well as at the beginning of the summer and fall semesters. In addition to documenting the appointment with an “Intake Note” in Titanium, the student will write an intake report to be approved and signed by his/her faculty supervisor and then attached to this same note.

8. “Initial Intake” procedures:
   a) Discuss Clinic operations, supervision, confidentiality, fees, etc. and (see intake interview procedures described in the following section) with the client. Properly document this has occurred in an Intake Note (Titanium).
   b) Important note – each intake clinician must ensure that his/her initial intake appointments are digitally recorded through the Riverstick system.
   c) Gather more detailed information from client regarding current presenting problem.
   d) Explain to client that someone will contact them soon to schedule his/her regular standing appointment time.
   e) Complete the “Initial Intake Report” according to the outline and example provided (please refer to sample in clinicians’ waiting room). Note - this is only an example and the clinician should defer to her or his supervisor regarding format and content of intake report.
   f) Turn completed report into the Clinic Director or your supervisor using Hushmail or a paper copy for review.
   g) The Clinic Director or your supervisor will return the intake report to the student clinician through Hushmail or via paper copy with noted corrections. Once finalized, the report may be uploaded, in the proper format, to the client’s electronic file.
   h) The student clinician and the Clinic Director or their supervisor’s electronic signature should be at the bottom of the intake report when it is in its final form.
   i) The Clinic Director will have the staff open the file and assign the case to a permanent clinician. Note - after seeing the client for the first scheduled appointment, the permanently assigned clinician should fill out an “Open File Request Form” in order to open the file under his/her faculty supervisor’s name (all cases are initially assigned under the student clinician and clinic director). If a file has been opened and assigned to a student and the client never returns for his or her appointment, the student clinician simply needs to make an assessment or therapy close note entry explaining the situation, which is co-signed by the clinic director. The file is then submitted for closing (please refer to section on file maintenance and closing).
   j) Each clinician will receive a notice when the case is assigned. The “Initial Intake Report” will suffice for the Clinic file and function as an initial treatment plan (as required by Texas Psychology Board Rules). However, please note that a formal treatment plan is required no later than after the fourth session (see section on treatment plan requirements). When students are assigned a transfer case (i.e., current client), an Intake Report will not be required unless the faculty supervisor deems it necessary to the case.
   k) A completed intake report on current electronic letterhead must be
uploaded to an intake note and forwarded unsigned to the supervisor (see
Titanium Manual for further instructions). Intake reports should be finalized
in PDF form with signatures and then Titanium note signed/locked in by
supervisor.

9. General information about intake interviews
   a) The client should be informed about the scope of confidentiality (see
      resources in the Clinic office) and about the training function of the
      Psychology Clinic at the beginning of the Intake interview, using the UNT
      Psychology Clinic Consent for Treatment information. Additionally, it is
      important to inform clients at the outset concerning semester breaks,
holidays, charges for missed appointments, etc. Copies of “Information
Guide for Psychology Clinic Clients” are available in the Clinic office.
   b) Clinicians inform clients about necessity to check in with Clinic office staff
      before each appointment
   c) The Intake interview is used to obtain the information needed to determine
      proper assignment of the case and to provide information needed to
      complete an Intake Report or Assessment Report following Clinic guidelines.
The report should include a summary of salient points of diagnostic and
therapeutic information contained in the Personal Information data, as well
as information gathered during the intake interview. It is designed to aid the
therapist in sorting through obtained information to substantiate a
reasonable diagnosis and to identify problem areas which most interfere
with the client’s successful functioning.

10. Referral and Disposition of Cases
    If the student-clinician, in consultation with his/her supervisor, determine that a
referral is needed because the client’s problem(s) and/or needs do not seem
appropriate for the services provided in the Clinic, such referral is made by the
supervisor and student-clinician. Referral resources available in the community
can be obtained by:
    a) Consulting the “Denton County Community Services Directory” in the Clinic
office
   b) Consulting the Clinic Director
   c) Calling the Denton County Mental Health Unit-Screening, Referrals, and
      Emergency Program at (800)762-0157; general number (940)381-5000.

Referrals may be made to a private physician, a psychiatrist, the University Counseling
and Testing Services Center (for students/staff/faculty of UNT only), Community
Mental Health Agencies, or any professional or agency deemed appropriate to meet
the needs of the client.

11. Psychiatric Referrals
    The Student Health & Wellness Center (SHWC) retains a minimum of one
psychiatric nurse practitioner. UNT Psychology student clinicians may refer UNT
students to the psychiatric nurse practitioner for diagnostic evaluation and
assessment for medication. The following procedures should be followed:
    a) Be thorough in your evaluation and determine the client’s level of need.
b) Discuss with your supervisor the possible need for psychiatric referral,
before making the referral.

c) Discuss need for referral with the client. There are many reasons that a client may react negatively to a psychiatric referral, so be sensitive. Since many clients are apprehensive about seeing a "shrink" or taking medication, it is best to take an educative approach. Referring to it as a “consultation with a psychiatric nurse practitioner for the most accurate information” may be one way to help relieve some anxiety. Encourage them to talk with the psychiatric nurse practitioner about their concerns as well (e.g., medication side effects, dependency).

d) Before the referral session, work with your supervisor to complete the Psychiatric Consultation Request form (located in Clinician’s Waiting Room). This form covers the purpose of consultation and description of problem. The Psychiatric Consultation Request form is printed on clinic letterhead and signed by student clinician and supervisor. A copy of this form MUST be given to the Clinic Senior Administrative Specialist to be scanned and uploaded to the client’s Titanium file, where student-clinician will have created a Psychiatric Referral Note.

e) During referral session:
   a. Have the client read and complete the Additional Information for Psychiatric Services Form (located in clinician’s waiting room) and a UNT Two Way Release Form (located in clinician's waiting room).
   b. Clients cannot call SHWC and schedule their intake appointments with psychiatric nurse practitioner. Therefore, a staff member from SHWC will contact the client after they receive the referral to make an appointment or refer them to a more appropriate agency.
   c. After session, the student-clinician should fax the Psychiatric Referral document, Additional Information for Psychiatric Services Form, and a UNT Two Way Release Form to SHWC at (940) 369-7042.

f) Following referral session
   a. Staff from SHWC will contact your client directly to engage them in setting up an appointment.
   b. The student-clinician should create a Psychiatric Referral Note to document all relevant information for the SHWC referral. Hard copies of all forms should be given to the Senior Administrative Specialist (Carla Houser) to be uploaded to this note. Do not sign this note.
   c. Once uploaded, Carla will send the Psychiatric Referral Note back to the student-clinician to sign and send to their supervisor to sign.
   d. The student-clinician should record any and all related contacts with a File Activity Note entry in Titanium.

12. Fee Setting and Collection
   a) There is no charge for the Intake Session. The on-call clinician who completes the therapy or assessment referral form (bluesheet/pinksheet) will quote a fee to the client using our sliding scale form. Clinicians will use the financial information provided by the prospective client to complete the fee sheet form (located in the on-call room). An initial fee MUST be set at entered on form (even if client intends to request a reduction). Upon
completion, the two forms should be stapled together and placed in the Clinic Senior Administrative Specialist’s desk-tray. Clients who need a reduction in their assigned fee must complete an application form (i.e. Fee Reduction Form) and provide necessary documentation to the clinic director for approval (see office staff for appropriate forms).

b) It is the responsibility of the student clinician to inform the Clinic office staff of any missed appointment in order that missed appointment fee is charged to the client’s account (per Fee Agreement Form).

**NOTE:** IF A THERAPY CLIENT DOES NOT PROVIDE 24-HOUR NOTICE OF CANCELLATION, CHARGE ½ THE REGULAR FEE FOR MISSED APPOINTMENTS. ASSESSMENT CLIENTS ARE CHARGED $20.00 FOR MISSED APPOINTMENTS.

c) No case file will be opened until the fee has been set and Clinic personnel have provided notification in writing.

d) The student-clinician is responsible for ensuring that the client has CHECKED IN with the Clinic office staff BEFORE beginning therapy and/or assessment sessions regardless if fee is due. This is particularly important because the client check-in information will be used to audit hours of direct client contact reported by student-clinicians on the Semester Summary of Hours form.

e) The clinician is responsible for checking the client’s balance on a regular basis to ensure the account is up to date. Clients with more than three unpaid appointments will not be seen until a payment is made.

f) The clinician is responsible for ensuring that the client HAS PAID ANY OUTSTANDING FEES BEFORE TERMINATION. Please check with Clinic office near to the termination date to verify that the client’s balance is in good standing.

13. Emergencies

a) Before seeing any cases in the Clinic, students should (a) read the Crisis Intervention Manual (located in the on-call room) (b) discuss crisis intervention procedures with their faculty supervisor, (c) rehearse or role-play the appropriate professional and ethical conduct for handling such emergencies, and (d) read relevant literature recommended by the faculty supervisor.

b) If an emergency exists, or if there is a possibility that an emergency will develop with a new (Intake) client, the on-call student-clinician should CONTACT the ON-CALL SUPERVISOR promptly. The student-clinician’s discussion with the on-call supervisor should include consideration of the following resources:

1. For UNT Students:
   - Campus Police Emergency 911

2. For non-UNT individuals:
   - Denton Police Dept. Emergency 911
   - Denton County Sheriff (940) 898-5601
   - Denton County Mental Health (940) 381-5000
   - EMERGENCY HOTLINE (800) 762-0157

c) Emergencies are, in most instances, considered properly referred when the
client is:
(1) In the custody of a family member or friend who assumes responsibility for the client.
(2) In the custody of a licensed psychologist or M.D. who assumes responsibility for the client.
(3) In the custody of the police.

If an on-going client comes to the Psychology Clinic office in an emergency situation and that client’s student-clinician (or faculty supervisor for the case) is not available, Clinic office staff notifies the on-call student-clinician and the on-call supervisor of the emergency.

e) An *Emergency Intervention Record (green)* form must be filled out immediately following all emergencies by the student-clinician and signed by the supervisor who handles the case. For current active clients, the signed Emergency Intervention Record is given to the GSA to be entered as a Crisis Intervention Note in the client’s Titanium file. The note will then be forwarded from the GSA to the clinic director for signature. If the person in crisis is not a Clinic client, this form is given to Clinic Senior Administrative Specialist and placed in the general Emergency Intervention File.

**Emergency crisis cards.** Within the main office of the Clinic, clinicians can find crisis cards to provide as a resource to client’s who may need additional resources for their safety. If providing a card to a client, please review the information with them to ensure they know how to best utilize the resources available to them. The crisis card should **NOT** be used in lieu of safety planning with a client in crisis but can be provided as an adjunctive resource.

14. Test Storeroom

a) Checking out materials:
(1) 2\textsuperscript{nd}, 3\textsuperscript{rd}, and 4\textsuperscript{th} year students can check-out materials during posted hours.
(2) 1\textsuperscript{st} year practicum students should receive necessary materials from their course TA or an upper-level student-clinician from their practicum team. 1\textsuperscript{st} year practicum students will be given full check-out privileges with their supervisor’s approval (e.g., 1\textsuperscript{st} year student-clinician who is administering their first independent assessment).
  i. First-year students are allowed to check out books, videos, and scoring templates
  j. First-year students needing full test storeroom privileges should obtain necessary form from the storeroom, have supervisor sign indicating approval, then return to storeroom staff for processing.
(3) Check-out requests will be processed by a Test Storeroom GSA.
(4) The student-clinician requesting materials must have a signed “Test Storeroom Agreement” form on file, acknowledging that he/she is assuming responsibility for the items checked out.

b) Returning materials:
(1) Returns will be processed by a Test Storeroom GSA.
(2) The student-clinician returning materials will receive an e-mail verification that he/she has properly returned the items listed.
Note: It is imperative that students retain ALL receipts/email that may be needed to determine who must assume responsibility for missing Test Storeroom items. As computers are not infallible, students are STRONGLY encouraged to keep ALL Test Storeroom receipts/email until graduation. Students who are unable to verify the proper return of a missing item(s) will be required to pay the replacement cost of the item(s).

15. Copying client information
   a) Please follow procedures provided in the subsequent Therapy Cases and Assessment Cases sections regarding any copying/mailing of client information to outside agencies.
   b) Assessment reports may not be mailed unless the fee is paid in full.
   c) Copying client information for any other reason (e.g., sample report for internship application, comprehensive core requirement, and classroom instruction) MUST be approved by the faculty supervisor.

Note: Student-clinicians MUST meet with their faculty supervisor to determine what information needs to be redacted/concealed (e.g., internship application report sample), before submitting a work request for copying/mailing.

16. Hushmail
   a) Hushmail is an encrypted email server that should be used for confidential communication regarding client information between student-clinicians and supervisors. Hushmail should also be used to send client related reports (i.e, intake reports, termination reports, assessment reports, etc.) between clinicians and supervisors. Hushmail should also be used to send the Senior Administrative Specialist emails from clinicians to be sent to specific clients. To do this, please send an email from your Hushmail account to psychologyclinic@unt.edu with the exact email you would like sent to your client. Also include your client’s email (i.e., where your message should be sent).
   b) When using hushmail, please encrypt the emails by checking the encryption box. For added protection, continue to password protect attached documents.
   c) Hushmail accounts are in the format of firstname.lastname@untclinic.hush.com. Hushmail can be accessed by going to hushmail.com. Please consult the Titanium Procedures Manual for specifics related to the Hushmail procedures.
   d) If you are unable to log in to your Hushmail account and/or forget your Hushmail password, please email the Graduate Student Assistant for the clinic to unlock your account.
B. THERAPY CASES

The following information is specific to therapy cases. See General Procedures section II (click here for more information).

1. Intake Report
   a) The Intake Report should include:
      - Basic demographic data (name, date of birth and age, education, occupation, etc.)
      - Presenting Problem(s)
      - Behavioral Observations
      - Social History
      - Diagnostic Impressions
      - Summary and Recommendations

   Important Note: All report writing is to be done in the document preparation room next to the Clinician’s Waiting Room. NEVER save identifying information to the computer’s hard-drive. Clinicians should use the “find and replace” editing command to replace non-identifying information (e.g., “Mr. X”) with the clients actual name before printing. This modified document MUST NEVER be saved. De-identified information saved to computer disk MUST be properly password protected (click here for password protecting directions).

   b) The Initial Intake Report or Intake Report MUST be submitted to the Clinic Director or supervisor within 2 working days of completing the intake interview. The student-Clinician who conducted the intake interview is responsible for writing the report.

   c) Examples of acceptable Intake Reports are available in the clinic staff room. This format is a guideline for writing intake reports. Reports are expected to vary according to individual circumstances and supervisor expectations. In general, however, each report should cover the basic information called for in each of the sections outlined above.

   d) If a report is to be released to another agency or individual, the report is to be printed from the Titanium record. A notation is made in a Medical Records Note Titanium entry regarding disposition of the report released and forwarded to the Clinic Senior Administrative Specialist. Provide any consent forms to the Clinic Senior Administrative Specialist to be scanned and uploaded into the created note. The note will be forwarded back to clinician for signature and supervisor co-signature.

   NOTE: Reports and correspondence are to be mailed by Clinic office STAFF ONLY. Student-clinicians are responsible only for submitting a work request with the necessary information (e.g., contact, address).
e) **ABSOLUTELY NO** client data are to be removed from the building, under any circumstances, without the consent of the Clinic Director. The Personal Information and ALL other data associated with client file are to be returned to the Clinic Office **30 minutes** prior to the scheduled Clinic closing time.

f) Any client information checked out for supervision purposes MUST remain in the student’s possession at all times and promptly returned to the clinic after supervision meeting has ended.

g) If the supervisor should deem it necessary to keep information overnight (e.g., assessment report review), he/she MUST check out file in his/her name.

2. Outcome Measures

Clients are asked to complete questionnaires at regular intervals during treatment (these questionnaires are an integral part of training and thus are required unless waived by the Clinic Director). The 4 standard measures used by all clinicians in the Psychology Clinic are the (1) Outcome Questionnaire (OQ, Lambert and Burlingame, 1996) the (2) Working Alliance Inventory (WAI, Horvath & Greenberg, 1989) the (3) Assessment of Signal Clients (ASC, Lambert et al., 2007) and the PDSQ (Zimmerman, 2002). These are administered to clients via the netbook computer. Other measures may be used according to supervisor preference. The OQ is given each week and the WAI and ASC are given approximately every 3 weeks. If the client is coming in for the intake or first session, the student-clinician must indicate in Riverstick and Titanium (via comments box when booking appointment) to NOT administer the WAI and ASC. If the Client attends multiple sessions per week, the student-clinician must indicate to NOT administer WAI and ASC multiple times per week. However, all Clients are required to fill out the OQ at the first session (not the intake session). The PDSQ is administered at intake and again toward the end of each long semester where client has attended greater than 6 sessions.

**Note** - the clinician is responsible for monitoring client’s responses to suicide-oriented questions on the OQ (items 8 and 23 - available immediately in raw score form in Titanium) prior to final scoring, particularly regarding cases where monitoring is indicated (e.g., significant depressive symptoms).

3. Opening, Maintaining & Closing Files

a) **New Cases**: ([click here for Forms used at Intake](#))

At the time of the Intake interview, the student-clinician determines if the client is a new or returning client (seen at least once previously in the Psychology Clinic, and therefore, already has a file) and then proceeds as follows:

(1) The student-clinician fills out an Open File Request Form and attaches it to the top page of the Personal Information Form (consent signature form). This form informs Clinic office staff as to the disposition of the case; i.e., that the student-clinician and his/her supervisor will continue with the case; that the case will be transferred; that the case will be referred outside the clinic.
(2) A FILE MUST BE OPENED AND AN INTAKE REPORT WRITTEN ON ALL CASES FOR WHICH AN INITIAL INTAKE INTERVIEW IS CONDUCTED.

(3) If it is determined at the Intake interview that the client will not continue as a client and he/she does not want to be referred to another professional or agency, this should be documented in the Intake Note in Titanium, the Intake/Termination Report completed and attached to appropriate Closure Note, and the file submitted for closing.

(4) In any case, the student-clinician who conducted the Intake interview is responsible for writing the Intake Report or Intake/Termination report and submitting it to the supervisor within 2 working days.

(5) If any of this information regarding therapy/assessment, fee, student/supervisor; date and student conducting intake is incomplete, the file will NOT be opened.

(6) All admission forms, testing materials, are to remain in the appropriate tray (TO BE OPENED, HOLD) until the file is opened.

(7) All direct client contacts (e.g., intake, assessment, therapy) or meaningful phone conversations (e.g., client crisis call, consultation with physician/case manager, client shares therapeutically relevant information) MUST be briefly noted in appropriate note type in Titanium (see Titanium manual for details).

(8) All other contacts (e.g., phone messages, scheduling appointments MUST be recorded in a File Activity Note (Titanium)

(9) All mailed documents must be recorded in client file as outlined above in section 1 of Therapy Cases.

b) Returning Clients: (click here for forms used at Intake)

(1) If a returning client is returning to see a previously assigned clinician, the original case file is checked out through Clinic office staff and submitted for reopening. A new file is not created.

(2) A new UNT Psychology Clinic Consent for Treatment form is completed and the Emergency Information Form is updated.

(3) The file is placed in the Clinic Senior Administrative Specialist’s tray in the Clinic office, with an Open File Request Form (with the student-clinician and supervisor’s name) paper-clipped to file.

(4) THE ABOVE PROCESS TAKES PLACE ONCE THE CLIENT HAS BEEN SEEN.

c) Counseling and Testing Services Clients:

(1) Clients being referred from CTS must call the Psychology Clinic to request services. A new blue-sheet referral form will be completed, and the case will be assigned by the Clinic Director.

(2) The client may request to continue with his/her previous CTS therapist when calling the Clinic. This request will generally be accommodated unless refused by clinician’s Clinic supervisor or if the request otherwise interferes with the training needs of other student-clinicians.

d) All Cases:

(1) Cases are opened no later than the Friday following intake. Once opened, the clinician will receive (in his/her mailbox) white half-page open request form with file number indicated. It is the student-clinician’s responsibility to check with Clinic office staff if it appears the case has not been assigned, given a file number and opened.

(2) Student-clinician and supervisor must sign all Progress Notes and
Reports. Follow the step-by-step instructions in the *Titanium Users Guide* to close the file.

(3) All reports should be on up-to-date clinic letterhead, attached in PDF form (unlocked and not password protected) to the appropriate note type, and signed electronically by clinician and supervisor. Due dates for forms and reports are as follows:

(a) **Intake Report** is submitted to supervisor within 2 working days of the completed interview.

(b) **Progress Notes** are completed and signed by clinician within 48 hours of each session or appropriate contact (see Titanium Manual for note types). There should also be progress notes concerning unusual circumstances (e.g., to indicate if the client will not be seen for several weeks). Supervisor’s co-sign all progress Note entries before or during supervision meetings.

(c) **Treatment Plans** must be completed for therapy clients within 4 sessions after intake. Treatment plans should be completed using the Treatment Plan Note within Titanium and should follow the requirements set by each supervisor.

(d) **File Activity Notes** should note the telephone communications, messages left, correspondence sent/received. Supervisor’s co-sign all File Activity note entries before or during supervision meetings.

(e) **Therapy Close Notes** should document the termination/closing of a therapy file. This note should include the required data form, a diagnosis, and an attached Termination/Treatment Summary Report. See termination section for more details.

(4) After the therapy case is opened, the paper file is set up by the student-clinician as outlined in "Sample File" located in Clinicians' Waiting Room.

e) Co-therapy Files:

(1) Co-therapists decide between themselves who will be the clinician of record responsible for keeping the file up-to-date.

(2) File data must be reviewed and signed by the supervisor as with any therapy case.

(3) If the co-therapists are not on the same team, only one supervisor is responsible for the case.

f) Family Case Files: ([click here for Forms Used at Intake](#))

(1) Family cases are kept in one file.

(2) If one of the family members is or has been seen for individual treatment, a separate new file **MUST** be opened for the family case.

(3) The file should contain signed UNT Psychology Clinic Consent for Treatment (adult and minor child), Emergency Contact Information, and Personal Information data for each member of the family.

(4) The intake can be written as a single report, with subsections for therapeutic and diagnostic specifics for each family member.

(5) In some instances, family members may be seen in individual therapy in addition to the family setting. Individual folders are set up for individual therapy cases and those files and the family file is cross-referenced.

(6) Therapists are responsible for notifying Clinic personnel regarding any
changes in family members being seen at the clinic.

g) Group Files:
(1) The file should contain a signed UNT Psychology Clinic Consent for Treatment, Emergency Contact Information, and Personal Information data for each client-member of the group.
(2) File data must be reviewed and signed by the supervisor as with any therapy case.
(3) If the co-therapists are not on the same team, only one supervisor is responsible for the case.
(4) An attendance record must be maintained for the group (see Clinic Director for directions).
(5) If the client is also being seen in individual therapy, that file must also contain completed Personal Information data and be cross-referenced with the group file.
(6) If the group is formed from clients selected and interviewed specifically for the group, the Intake Report can be written as a single unit, with subsections for therapeutic and diagnostic data specific to each member.
(7) If the group is formed from clients referred from various Clinic teams, each client will already have an Intake Report in his/her individual file folder. A copy can be placed in the group folder. The files are cross-referenced.

h) Checking Out Client Files:
Files are pulled by the Clinic office staff ONLY.
To have a file pulled:
(1) The student-clinician fills out an “OUT GUIDE” and has an office staff member pull the file. An “OUT GUIDE” is completed for each file to be pulled.

i) File Maintenance:
(1) All files are regularly audited by Clinic office staff at two levels:
(a) The first level covers completeness and timeliness. Files are checked for the presence of all required forms, data, protocols, notes, reports, information releases, authorizations, and signatures. Student-clinicians whose files are deficient will receive reminders. If the reminders are ignored, deficiency notices will be sent to the clinician and his/her faculty supervisor (AND MAY AFFECT THE STUDENT’S GRADE).
(b) The second level covers consistency with Clinic procedures and practices. Of primary concern are the Intake Report, Termination Report, Progress Notes, File Activity Notes, and Assessment Report.
(2) Audits of files are intended to aid the student-clinicians in keeping client file information within Clinic and legal guidelines.

j) Transfer/Referral of Cases:
(1) A therapist who cannot continue a therapy case but determines the client needs further services is responsible, together with the supervisor, for transfer or referral. If the client is referred outside the Clinic, a Termination Report is prepared and filed. If the client is transferred within the clinic, to another therapist, a Termination Report is also prepared. The student-clinician must then complete a Transfer
Request Form (green) and submit it to the Clinic Senior Administrative Specialist to be re-assigned. Any information the referring therapist can provide in terms of recommendations (e.g., gender of new therapist, etc.) will be helpful in assigning the case.

NOTE: All changes regarding the clinician assigned to a case MUST have either a new “Blue-sheet Referral” (i.e., assessment case to become a therapy case) or a green Transfer Request Form (i.e., transferring to a new therapist) completed and given to the Clinic Senior Administrative Specialist for processing.

(2) If a therapy case is transferred to another supervisor, with the same student-clinician continuing as therapist, the student-clinician completes a “Transfer of Supervision Note” within Titanium (most commonly in at the beginning of the Summer term and Fall semester). To do this, the clinician should select their current supervisor and assuming supervisor within the data form. The clinician should sign on line 1, the current supervisor should sign on line 2, and the assuming supervisor should sign on line 3. Once the assuming supervisor has signed on line three, the clinician should print the note with the data form, attach it to their client’s file and submit it to the Clinic Senior Administrative Specialist.

(3) The Termination Report should be a concise summary of the significant therapeutic material covered to date and should include a clear statement of the anticipated course of treatment and probable prognosis. Any questionable, difficult areas or complications should be noted.

(4) The therapist is responsible for ensuring that the transfer to the new therapist or referral is accomplished in a smooth, professional manner. It is recommended that the therapist prepare the client for transfer well before the therapist’s actual departure. Since team supervisors are ultimately responsible for client management, it is necessary for the supervisor to monitor and ensure timely, appropriate disposition (i.e., transfer or referral).

(5) Under no circumstances should the referring clinician make any promises to a client concerning the re-assignment of the case. Although most recommendations are followed, not all clients can be accommodated (e.g., limited summer practicum teams).

k) Termination
(1) When a case is terminated FOR ANY REASON, the therapist is responsible for writing a Therapy Close Note stating the reason for closure (e.g., client decided not to continue therapy, case transferred to an outside professional/agency, etc.). Please also complete the required Closing File-Supervisor Close Data Form, provide a diagnosis within the diagnosis tab, and attach a Termination/Treatment Summary Report. If the case is transferred outside the Clinic, the reason and the professional/agency to whom the transfer is made should be noted.

(2) The therapist is responsible for preparing a Termination Report. The Termination Report should be a concise statement of the client’s course through therapy, significant difficulties and degree to which these were
addressed, reason for termination, and probable prognosis.

(3) When a client terminates prematurely, the supervisor will decide on the appropriate procedure; however, a Therapy Close Note and all associated requirements, must be completed. Referrals to another Clinic therapist or to another agency or professional are possible options to offer a client who does not wish to continue with the same therapist. Any steps should be documented in a Progress Note entry.

(4) At the end of the spring semester all files must be closed. If a student intends to continue with the client in the summer she or he must complete a Treatment Summary Report (see Titanium Manual for details). Please attach this report to the Therapy Close Note.

(5) Closing the file is initiated by the student-clinician by placing the client file in the “To be Closed” in-box/tray with Director Close Note completed and forwarded to the Clinic Director. The student-clinician must follow the step-by-step outlined procedure for closing a file located in the Titanium Users Guide for Clinicians.

C. ASSESSMENT CASES

The following information is specific to assessment cases. See the General Procedure’s for additional information (click here for more information).

1. Assignment of Cases:
   a) Assessment referrals are assigned to students by the Clinic Senior Administrative Specialist on a rotating basis. The student and his/her supervisor determine appropriate disposition of the case (e.g., acceptance, transfer, or referral). When a case is accepted by a student-clinician and his/her supervisor, the procedures outlined in Section 2 below will be followed.
   b) Incoming and ongoing therapy cases provide another source for assessments. These are usually completed by on-team student-clinicians.
   c) Assessments are typically the responsibility of second or third year students as part of their team assignments (1st draft ASSESSMENT REPORTS ARE DUE TO SUPERVISOR FOR REVIEW 1 WEEK AFTER TESTING IS COMPLETED).
   d) Students and faculty supervisors are STRONGLY encouraged to complete assessment report no later than 30 days after the completion of testing. Only in rare circumstances (with appropriate explanation documented in the client’s file) should a final assessment report and feedback to the client occur more than 60 days after testing is completed.
   e) First year students who have been checked out on particular tests may administer those tests as part of the upper-level student’s battery, but the upper-level student and faculty supervisor remain responsible for interpretation of the results and writing of the final report.
   f) Third year students may do assessments if they elect to do so or if assigned by their team supervisor.
   g) Occasionally outside referral agencies (e.g., MHMR, Denton County Mental Health Court, TWU) request evaluations. Please coordinate all such assessment activities (e.g., communications, billing) with the Clinic Senior Administrative Specialist.
2. Procedure:
   a) When a student receives an assessment referral and it is accepted by the
      supervisor, he/she should contact the client immediately to schedule an
      appointment to begin the evaluation. The student checks with appropriate
      clinic personnel regarding fee setting and collection.

      **Note:** Assessment clients are expected to pay $\frac{1}{2}$ of the fee before test
      administration begins. The remainder of the fee should be collected before
      feedback or completion of the assessment report. Clients are charged
      $20.00 for missed assessment appointments.

   b) Tests to be included in the battery will be determined by the student
      together with his/her supervisor. The decision will be based on the
      information needed to answer the referral question. A test battery usually
      consists of a social history interview and psychological, vocational, and
      educational tests the student-clinician and his/her supervisor consider
      appropriate.

   c) The student schedules the appointment in the Riverstick and Titanium
      systems.

   d) When meeting with the client for the first time, the student makes sure the
      client has checked in with Clinic personnel to fill out all forms and
      questionnaires.

   e) The student-clinician must indicate which tests were administered in the
      body of each Assessment Note and by attaching the “Test Admin.V2” data
      form to the Assessment Close Note in Titanium.

   f) The student will also ensure that the client has completed the appropriate
      Clinic Personal Information data (Adult/Child/Adolescent) and any relevant
      authorization and/or release forms. The fee setting and completion of
      forms will be accomplished before the interview and assessment begin.
      (click here for Forms Used at Intake).

   g) Generally, the assessment fee is established prior to the first meeting. If the
      fee has not been established prior to this first meeting, the client must first
      talk to the Clinic office staff to set up their fee.

3. Assessment Files
   a) Clients who are in therapy or who are entering therapy do NOT have
      separate files for the assessment. The test protocols (bottom right) and
      reports (top right) are kept in the therapy files in the designated location in
      the file folder.

   b) ALL APPLICATIONS, RAW DATA, AND PROTOCOLS ARE KEPT IN THE CLIENT
      FOLDER AND ARE NOT REMOVED FROM THE CLINIC AREA EXCEPT FOR
      SUPERVISION. ALL MATERIALS ARE TO REMAIN IN THE BUILDING AT ALL
      TIMES AND RETURNED TO CLINIC OFFICE 30 MINUTES PRIOR TO CLOSING.

   c) If supervisor deems it necessary to retain client information overnight,
      he/she MUST check out file.

   **Important Note:** All report writing is to be done in the document preparation room (Terrill Hall
   Room 174) next to the Clinician’s Waiting Room. NEVER save identifying information to the
computer’s hard drive. Clinicians should use the “find and replace” editing command to replace non-identifying information (e.g., “Mr. X”) with the client’s actual name before printing. This modified document MUST NEVER be saved. Documents must be password protected. Directions to protect follow: To Password Protect (in Microsoft Word) (1) Open the document. (2) On the File menu, click Save As. (3) On the Tools menu in the Save As dialog box, click General Options. (4) In the Password to open box, type a PASSWORD, and then click OK. (5) In the Reenter password to open box, type the password again, and then click OK. (6) Save.

d) The student enters ALL contacts with the client, including telephone contacts, missed appointments, messages left in “File Activity” notes in Titanium.

e) Assessment Notes are required for ALL assessment sessions and should reflect any additional information (e.g., client’s effort, attention, affect, etc.) and tests administered on each session – DO NOT attach “Data Form” with tests administered until you have completed testing (i.e., only attach ONE form on the Test Admin Data Form with all of the tests listed in “Assessment Close Note” entry in Titanium).

f) Assessment Reports are to be attached to the client’s Assessment Close Note by the clinician with their electronic signature as a word document. The clinician’s supervisor should then sign the report and convert it to a PDF document. Physical copies of the assessment report can be printed for the client once attached as a PDF and are not required to be maintained within the client’s physical file. Reports should be unlocked (i.e., not password protected) when in their final form within the Assessment Close Note.

Supervisor should not sign on the final line until feedback has been completed (if possible) and all aspects of the Assessment Close Note are present.

g) “Assessment Only” files should be closed after the assessment has been completed, the interpretive interview (if any) has been conducted, or the original report filed or forwarded to the appropriate individual/agency, or the copy of the psychological report has been placed in the electronic file (disposition of report must be noted in file closing “Data Form”).

h) At the end of the spring semester, when ALL files MUST be closed, any file with a completed assessment report should be closed with an Assessment Close Note, even if feedback has not yet occurred (following specific procedures in Titanium Manual). Administrative Assessment Close Note is used only for incomplete assessments.

i) A Feedback Note is only required If and when an actual feedback appointment occurs; it should only include a written summary of the feedback appointment. No data forms or diagnoses should be included within this note.

Note - If an assessment file needs to be administratively closed before the evaluation is actually completed (typically at then of the spring semester), the following phrase must be placed at the top of report: “ADMINISTRATIVE ASSESSMENT CLOSURE REPORT” – DO NOT imply the report in any way represents a psychological assessment or evaluation. See below for more details.

The report is attached to an Administrative Assessment Close Note and submitted for closure as outlined below.
j) **Closing the file** is initiated by the student by sending the Assessment Close Note to their respective supervisor. Within this note please attach your assessment report. The **Assessment Close Note** will also require that you complete the TEST ADMIN data form and the Closing-File Supervisor Data Form (which documents your credits for the assessment battery). The Assessment Close Note will also require that you indicate a diagnosis in the diagnosis tab. Then you will forward the Assessment Close Note, *without* your signature, to your supervisor who will sign your assessment report and convert it into a PDF. Then, the supervisor will forward the Assessment Close Note back to you. Please do not sign the Assessment Close Note until you are ready to close the file, either after feedback has occurred or once it has been determined that there will not be a feedback session. **Feedback Notes** should only be used to document what happened if and when you provide actual feedback to the client. **No** data forms are required within a Feedback Note.

k) Once the Assessment Close Note has been signed, please initiate a “Clinic Director - Close Request Note” saying “File XXXX is ready to close.” Only do this when the file is 100% ready to close – see Titanium User Guide for Clinicians for further information. **NOTE** – a diagnosis, Test Admin Data Form, and a Closing File- Supervisor Data Form are required to complete an Assessment Close Note in Titanium.

l) For **“assessment only”** clients, Clinic office staff open the assessment file after the Intake interview. “Assessment only” cases are opened in the same manner in which Therapy cases are opened ([click here for information about opening cases](#)). It is the responsibility of the student-clinician assigned to the case to ensure that the assessment paper file is properly set up as outlined in the “Sample File” located in the Clinicians’ Waiting Room.

m) **Administrative Assessment Closures**: At the end of each Spring semester, all assessment files must be closed. If a student intends to continue with the client, they must complete an Administrative Assessment Closure Report (see Titanium Manual or appendix at the end of this manual for more details). Please attach this report to an Administrative Assessment Closure Note. This note will require an Administrative Assessment Closure-Supervisor Data Form and the attachment of an Administrative Assessment Closure Report. Ensure that the report is unlocked (i.e., not password protected), a PDF, and electronically signed by clinician and supervisor. Please DO NOT attach a Test Admin Data Form or a diagnosis to this note.

4. **Assessment Reports**

   a) Assessment reports **MUST** include the following statement at the beginning of the report (and may be added as an italicized, reduced font, footer on each page):

   “The content of this psychological evaluation is based on the clinical interpretation of psychological test results, behavioral observations, and interview information in combination. The Psychology Clinic will not be responsible for additional interpretations or uses that are made of the
enclosed test scores. Any release of this information other than to the client is strictly controlled by Texas statutes.”

b) A report is written on every assessment. It should contain the following information:
   - Client demographic information, test dates, clinician name, file number, supervisor name, page numbers
   - Referral Question
   - Tests Administered
   - Behavioral Observations
   - Background Information
   - Test Findings
   - Diagnostic Impressions
   - Summary and Recommendations

c) The student-clinician, together with his/her supervisor, determine whether an interpretive feedback session to discuss test findings with the client is appropriate or whether this should be left to the referring person or agency.

d) The report must be approved and signed by the student’s supervisor BEFORE it is provided to a client and/or referral source.

e) Assessment reports are to be attached to the client’s Assessment Close Note by the clinician with their electronic signature as a word document. The clinician’s supervisor should then sign the report and convert it to a PDF document. Physical copies of the assessment report can be printed for the client once attached as a PDF and are not required to be maintained within the client’s physical file. Reports should be unlocked (i.e., not password protected) when in their final form within the Assessment Close Note.

f) If the report is to be sent to an outside agency/individual, or is to be given to the client, the following procedure is followed:
   1. The report is first signed and uploaded to the client’s electronic file.
   2. A printed copy of the report is mailed to the designated destination with a “Assessment Close Note”, “Medical Records Note”, or “File Activity Note” (which ever type pertains – see Titanium Manual) entry regarding disposition of the assessment report. The mailing date is noted in the client file in the narrative portion of the note.
   3. The student-clinician notifies the Clinic Senior Administrative Specialist that it has been completed so the client’s account can be updated and an invoice can be sent as appropriate.
   4. The file is submitted for closing (procedures outlined in previous section under maintaining assessment files (click here for procedures information)).

5. Conducting an Assessment with an Existing Therapy Client
   a) Assessment of therapy cases is usually completed by the team handling the case.
   b) The content and extent of the assessment is determined by the supervisor and team members. This determination is based upon intake information and the data needed to clarify a diagnosis and treatment plan for that client. The assessment may be as limited as a PAI or as extensive as a full intellectual, personality, vocational, and education evaluation.
c) The supervisor and team determine which student-clinician will take primary responsibility for assessing each client.

d) When the assessment is completed, the report is written, signed by the clinician and supervisor, following procedures outlined above.

e) Therapy clients are charged for assessments in accordance with the Fee Schedule. If, in the judgment of the clinician and his/her supervisor, there are extenuating circumstances, the fee can be adjusted or waived. In this case please notify the Senior Administrative Specialist in the clinic office to make arrangements for adjusting or waiving the fee.

f) Sometimes it is important during the course of therapy to reassess a client who has been in therapy for some time. If a student clinician, with the support of his/her supervisor decides that a reassessment (or initial assessment of a client who has been in therapy) would be beneficial; the team determines which student will evaluate the client and proceeds as outlined above. The therapist discusses with the client the need for testing, sets the assessment fee, and introduces the assessment clinician to the client.

6. Office of Disability Accommodation (ODA) Assessments
   a) The prospective client typically initiates ODA referrals. However, on occasion, the Clinic receives referrals directly from ODA (usually with proper release of information provided).
   b) Clients referred from ODA pay for assessments based on the Clinic schedule of fees (i.e., there is no implied discount for UNT students).
   c) All assessment reports for ODA must include a DSM diagnosis as well as tables of I.Q. and achievement standard scores.
   d) For ADD/ADHD and learning disorder evaluations, it is particularly important to provide detailed recommendations that are specific to the difficulties/limitations identified (e.g., an individual may not meet the criteria for a learning disorder per se, however, he/she may have significant processing issues that impact his/her ability to learn etc.).
   e) When making recommendations for classroom or course accommodations, do not be overly specific (e.g., “extra two weeks on course assignments”). Providing more generalized recommendations such as “extra time during tests” allows the professionals at ODA to construct and modify accommodations to better tailor to the client’s specific needs in a variety of different environments.

D. OTHER IMPORTANT INFORMATION
   a) Students are strongly encouraged to purchase professional liability insurance as the University will not indemnify for practicum/course related activities. Students can purchase professional liability insurance through “The Trust” at a nominal fee, if they have an APA student affiliate membership.
   b) All subpoenas must be submitted to the Clinic Director who is recognized by law as the Custodian of Records for the UNT Psychology Clinic.
   c) Requests of information may be declined if the licensed psychologist determines that said release could jeopardize the client’s life. However, if
such a refusal is made, written explanation of the reason(s) must be provided with 72 hours as well as providing information regarding the clients right to appeal.

d) Test data (e.g., protocols) are not considered part of the client’s “mental health record” but rather are part of the clinician’s working notes. Although APA Ethical Principles discuss the client’s rights to such access, the Attorney General of the State of Texas has interpreted the law (A.G. Opinion 97-073) and determined that a licensed psychologist does not have to release raw data. Exception -- a licensed psychologist “shall” release raw data to a “qualified mental health provider” making such a request as well as “pursuant to a court order to whomever the order requires release.”

e) HIPAA law does NOT supersede Texas State law. In other words, when HIPAA and Texas law conflict (e.g., release of raw data), Texas law trumps.

f) Title IX Reporting Mandate:
Pursuant to the Texas Education Code, an employee who is designated as a person with whom students may speak confidentially concerning sexual harassment, sexual assault, dating violence, or stalking are no longer exempt from reporting the alleged conduct when they receive information regarding an incident under circumstances that render the employee’s communications confidential or privileged under other laws. As of September 1, 2019, new state legislation requires Confidential Employees to report sexual harassment, sexual assault, dating violence, and stalking to the UNT Title IX Coordinator or Deputy Title IX Coordinators. The report should include “only the type of incident reported,” and cannot “include any information that would violate a student’s expectation of privacy.” Failure to satisfy this reporting requirement can lead to administrative penalties, termination, and potential criminal sanctions.

1 Although we are in fact required to report incidents described above for UNT student clients (there is no requirement to report community-based clients), in the psychology clinic, we are considered “confidential employees”, which affords us a different set of expectations such that client confidentiality can be assured.

   a. There is a separate link used by confidential employees to report Title IX incidents. Confidential Employees report here Incident Reporting
   b. Prior to making a report, ALL CLINICIANS MUST consult with their supervisor, following which an appointment is scheduled with the clinic director to actually submit the final reporting.

g) The UNT Psychology Clinic does not provide clients with specific documentation needed to obtain an emotional support animal (i.e., letter of support signed by a licensed psychologist). We inform clients that they can receive a summary of treatment, which they can provide to a physician, who in turn can make determination and provide documentation if deemed appropriate.

h) Emotional Support Animals (ESA’s) are not allowed within the Psychology
Clinic. We are obligated to follow the university’s policy (16.002) regarding animals on campus (see https://disability.unt.edu/services/service-and-comfort-animals), which only allows Service Animals within buildings on campus. ESAs are only allowed in on-campus dormitories, with proper documentation processed and approved by the housing office.

i) **When in doubt, seek consultation and notify the Clinic Director** of any potentially legal issues involved with any Clinic case.

UNT PSYCHOLOGY CLINIC SOCIAL MEDIA PRACTICES

Staff

The following document specifies the UNT Psychology Clinic’s practices related to the use of social media for employees and students. Social media includes personal blogs and other websites, including Facebook, LinkedIn, Instagram, Twitter, YouTube, Snapchat, or others. These guidelines apply whether employees and students are posting to their own sites or commenting on other sites. Please read this guide to inform how we, as mental health professionals, conduct ourselves regarding the use of the Internet. This document also provides information regarding how the UNT Psychology Clinic will respond to certain situations that involve the use of Internet.

As the internet evolves, these practices will need to be updated regularly. If there are any questions, comments, concerns, or ideas related to this material, please consult with the clinic director.

- Follow all applicable UNT Psychology Clinic practices. For example, you must not share confidential or proprietary information about the UNT Psychology Clinic and you must maintain the confidentiality of your clients.
- Ensure that your social media activity does not interfere with your work commitments.
- If you identify your affiliation to the UNT Psychology Clinic, your social media activities should be consistent with our ethical standards of professional conduct.
- Be respectful and professional, use good judgment and be accurate and honest in your communications; errors, omissions or unprofessional language. Behavior may reflect poorly on the UNT Psychology Clinic.
- If you communicate through the internet about the UNT Psychology Clinic, or about matters related to the services provided, you must ensure that you are following our confidentiality rules and expectations. Any form of “post” or conduct that reflects poorly on the ethical standards of psychology will be subject to review by the clinic director, and may result in disciplinary actions.
• Write in the first person. Where your connection to the UNT Psychology Clinic is apparent, make it clear that you are speaking for yourself and not on behalf of UNT. In those circumstances, you should include this disclaimer: "The views expressed on this [blog; website] are my own and do not reflect the views of the UNT Psychology Clinic." Consider adding this language in an "About me" section of your blog or social media profile.

• The UNT Psychology Clinic strongly discourages staff to accept any contact requests from current or former clients on any social networking site (e.g., Facebook, LinkedIn), except in unusual circumstances (e.g., an in-person friendship pre-dates the treatment relationship).

• Adding clients as contacts on these sites can compromise confidentiality and privacy. It also may blur the professional boundaries and complicate therapeutic relationships. Staff in client care roles should not initiate or accept friend requests from current or previous clients.

• The UNT Psychology Clinic discourages staff in management or supervisory roles from initiating “friend” requests with the student clinicians under their supervision; however, they may accept a request if they do not think it will negatively impact the work relationship.

• All materials from the clinic (e.g. assessment tools, tape/audio) and our facilities, as well as our client’s identities, are to be kept confidential. Any activity that is questionable, that could violate HIPAA procedures, or that gives the appearance of violating private information, will be subject to review by the clinic director, and may result in disciplinary actions.

• Even with confidentiality protected, staff and trainees should refrain from providing any particulars about clients, positive or negative, that could be construed as “gossipping,” complaining, or violating clients’ privacy, even though their identities are being protected.

Thank you for taking the time to review the UNT Psychology Clinic Social Media Practices. If you have any questions, comments, or concerns about any of these
practices, or about potential interactions on the Internet, do not hesitate to bring them to the clinic director’s attention.

Sign below to indicate that you have read and understand the above procedures.

Printed name: ________________
UNT PSYCHOLOGY CLINIC SOCIAL MEDIA PRACTICES

Client

The following document outlines the UNT Psychology Clinic’s practices related to the use of social media, including personal blogs, websites, and apps such as Facebook, LinkedIn, Instagram, Twitter, YouTube, Snapchat, or others. Please read the information to better understand how we conduct ourselves as mental health professionals and how you can expect us to respond to various situations that involve the use of the Internet.

As the internet evolves, these practices will be updated regularly. If there are any questions, comments, concerns, or ideas related to this material, please feel free to discuss this with your clinician, the clinic staff, or the clinic director.

On “Friending”

The clinic director, faculty supervisors, clinic staff, student-clinicians, or other employees are not allowed to accept contact requests from current or former clients on any social networking site (Facebook, LinkedIn, Instagram, etc.). We believe that adding clients as contacts on these sites can potentially compromise, not only your confidentiality, but our respective privacy. This contacting may also create issues regarding the therapeutic relationship.

There may be some faculty supervisors, staff members, student-clinicians, or other employees who publish blogs, have professional Facebook pages, or other similar professional social media pages. Clients are welcome to view the posts, and to read or share articles published there. However, clients should not request “friendship” or to be added as contacts. We believe that such situations could increase the likelihood of compromised client confidentiality. Our primary concern is to protect clients’ privacy and to preserve therapeutic relationships. Note that clinic staff, faculty supervisors, student-clinicians, or other employees are not allowed to make a “friend” request or ask to add you to their contacts. If such situations arise, please bring it to our immediate attention.

On Interacting

Please do not use SMS (mobile phone text messaging) or messaging on social networking sites to contact us as these sources are not secure. Please do not use Wall
postings, @replies, private email addresses or other means of engaging with clinic staff, faculty supervisors, student-clinicians, or other employees online, as such contacts could comprise your confidentiality. The best way to reach us is by calling the UNT Psychology Clinic phone number; if the person you are trying to reach is not available, we will take a message and provide it to the intended recipient. Please refer to your copy of our Notice of Privacy Practices for additional information regarding protected health information (i.e., HIPAA, 1996).

**Email**

We only use email as a way to arrange or modify appointments. Please be aware that these interactions must be made through the official UNT Psychology Clinic email address (PsychologyClinic@unt.edu). Please do not email us content related to your therapy or assessment session(s), as email is not a completely secure or confidential method of communication. You should also know that any emails that we receive from you, as well as any responses given, will become a part of your file.

**ON THE USE OF SEARCH ENGINES**

It is not a regular part of our practice to search for clients on search engines such as Google or Facebook. Extremely rare exceptions may be made during a specific crisis situation. If we have the suspicion that you or someone else may be in imminent danger and we cannot reach you through our usual means, there may be a situation in which we might attempt to find you in other ways to ensure your welfare. These are extremely rare situations, and we do not expect them to occur.

**On Business Review Sites**

There may be business sites in which the UNT Psychology Clinic is listed. This includes forums in which users can rate their satisfaction with the services provided. Please know that those listings are not a request for testimonials, ratings, or endorsements from you as clients. We understand you have the right to express yourself in any way you wish; however, due to confidentiality issues and ethical concerns, we are not allowed to respond to any reviews, regardless of whether they are positive or negative.

**Conclusion**
We thank you for taking the time to review this document. If you have any questions or concerns about these practices and procedures, please feel free to bring them to our attention.
Clinic Report Templates

Please note: the following report templates are intended to provide direction for student clinicians regarding the desired formatting within the UNT Psychology Clinic. Supervisors have their own requirements for report content or specific formatting.

CONFIDENTIAL PSYCHOLOGICAL ASSESSMENT

The content of this psychological evaluation is based on the clinical interpretation of psychological test results, behavioral observations, and interview information in combination. The Psychology Clinic will not be responsible for additional interpretations or uses that are made of the enclosed test scores. Any release of this information other than to the client is strictly controlled by Texas statute.

Name: Fake Client
Date of Birth: 11-05-1991
Age: 27
Sex: Female
Race/Ethnicity: White

File #: 1234
Date of Intake: 02/13/2019
Date of Report: 04/14/2019
Clinician: Fake Clinician, M.A.
Supervisor: Fake Supervisor, Ph.D.

REASON FOR REFERRAL
Mr. Client is a 25-year-old, White male who was referred to the University of North Texas (UNT) Psychology Clinic by his current psychiatrist, Dr. Fake. The purpose of the current evaluation was to assess Mr. Client’s cognitive and psychological functioning to determine if he meets any current diagnostic criteria that may explain his stated difficulty with attention.
